BASELINE STATUS ASSESSMENT

NEW TO GDPR COMPLIANCE? KICKSTART YOUR GDPR PROGRAM WITH THE BASELINE STATUS ASSESSMENT!

You can hardly have missed the introduction of the GDPR on May 25, 2018. This European privacy law protects all citizens of the European Union, and applies to all organizations operating on the EU market.

COMPLIANCE SET-UP

Does your organization target EU citizens and do you process their personal data? Or maybe you are a supplier to an organization operating on the EU market? Then you will need to work on GDPR compliance. But where to start with the implementation of such a broad and impactful piece of legislation? Do you have a clear overview of all the personal data in your organization? We can imagine you are not particularly excited to start the long and impactful process of implementing the GDPR. Hit the (privacy) ground running with our baseline status assessment: a great start on the road to privacy compliance.

BENEFITS

- A pragmatic explanation of GDPR legislation and the impact on your organization
- A complete overview and insight in your current level of compliance
- Extensive report including explanations and recommendations
- A step-by-step plan for improving privacy compliance
- Start working on awareness through our methodology

KICK-START YOUR PRIVACY PROJECT

Give your privacy compliance project a kick-start with the baseline status assessment. Our assessment gives you a clear overview of your current level of compliance. Moreover, the assessment indicates the most effective points of action your organization could undertake in order to boost compliance. By reviewing relevant documentation, interviewing key employees and utilizing our expert knowledge on privacy compliance, we are able to quickly present you an overview of your current level of compliance. Depending on the size of your organization we are able to present you a complete overview within two to three weeks! We will present you with a detailed and pragmatic report including plenty of recommendations, explanations, and a plan for improving your privacy compliance. More than enough information to start your privacy project.
