SECURITY BASELINE STATUS ASSESSMENT

NEW IN INFOSEC? GET A KICKSTART WITH THE BASELINE STATUS ASSESSMENT!

Information Security; Sooner or later you will need to start working on your security compliance. Whether implied by GDPR, through customers, or via employees. Where do you begin to secure all information your company possesses? Several compliance standards have been introduced for different industries. These standards are often lengthy and extensive, making them difficult to implement. Kickstart your InfoSec compliance with the Baseline Status Assessment.

VITAL IMPORTANCE

Information is of vital importance for organizations. In fact, for many businesses their livelihood depends on information. It is important to properly process information and protect it from hackers, competitors, loss, or damage. To make sure information is available, correct, and only accessible to people authorized to do so, you will need to implement Information Security policies. Keep in mind: this is not limited to locking the front door and IT projects! Awareness is a very important part of Information Security.

KICKSTART YOUR SECURITY PROJECT

Give your security compliance project a kickstart with the baseline status assessment. Our assessment gives you a clear overview of your current level of compliance. Moreover, the assessment indicates the most effective points of action your organization could undertake in order to boost compliance. By checking relevant documentation, doing interviews with key employees and using our expert knowledge on InfoSec compliance we can quickly present you an overview of your current level of compliance. Depending on the size of your organization we can present you a complete overview within two to three weeks! We will present you with a detailed and pragmatic report including plenty of suggestions, explanations, and a plan for improving your security compliance. More than enough information to start your security project.

BENEFITS

- A pragmatic explanation of InfoSec;
- A complete overview and insight in your current level of compliance;
- Extensive report including explanations and suggestions;
- A plan for improving security compliance;
- Start working on awareness through our methodology.
