PRIVACY MATURITY LEVEL ASSESSMENT

CONTINUOUS COMPLIANCE: IN CONTROL OF GDPR

Your organization is working hard to meet GDPR-legislation. You have done a lot of work on implementing different measures to create a solid basis for GDPR compliance. Now that you have laid the groundwork it's time for the next questions: are we compliant enough? What is the next step? And how do we keep control over GDPR compliance?

CONTINUOUS IMPROVEMENT

Privacy compliance is not achieved through a quick fix. It is a program demanding continuous attention. A method of working that requires continuous improvement. Every internal and external change requires a revision of GDPR policy. This reinforces the importance of staying focused on privacy, and to continuously improve by implementing an improvement cycle.

MATURITY LEVEL ASSESSMENT: INSIGHT AND A CONTROL FRAMEWORK

Have you laid the groundwork for your privacy program and are you ready to implement an improvement cycle? Start your privacy program with our Maturity Level Assessment! We audit your current level of compliance and determine your maturity level (1-5) for each measure. This scaling gives you an overview of the organization's general maturity level. Together we determine the desired maturity level, and we gain input for an improvement plan. For each measure we determine which steps have to be taken to reach the desired level of maturity. Pragmatic and accessible. Our assessment report simultaneously provides a control framework which will support the set-up of the improvement cycle. Our assessment report will be presented including a visual dashboard to support progress reports to the board and senior management.

BENEFITS

- Maturity level for each measure;
- Clear steps to reach the next maturity level in GDPR Compliance;
- Pragmatic assessment report to support improvement cycle;
- Visual dashboard to support progress report.
