AWARENESS TRAINING

CONSCIOUSNESS, AWARENESS AND LEARNING IN ONE

Security, privacy, risk management. These are subjects where transferring knowledge is of great importance. How do you get your employees informed quickly and in the same way? Where can they ask questions they've been dealing with for some time? Right! During a training session of Audittrail.

WHY IS IT IMPORTANT

Training and learning sessions are of great importance. Of course you can inform your employees on a passive way, but a fun, interactive training has proven more impact. The various groups of organizations also have different wishes or needs. For example, a board or management team has different needs than a group of specialists. Also, some employees or senior staff don't have direct responsibilities or knowledge on the subject, but you would like them to gain certain knowledge and be aware of the risks in the field.

HOW DO WE HELP?

Audittrail specialists are very experienced in providing information sessions and training. The Audittrail trainers transfer the knowledge in a pleasant and accessible way. In addition to formal training courses and courses within active elements, we also offer a pub quiz: an informal, but informative quiz.

We provide generic training in the areas of information security, privacy (GDPR, CCPA, etc.) and risk management. Your organization needs a specific training, tailored to the needs of a group of employees in the organization? We are happy to provide in a tailored training portfolio. From multi-day to 2-hour sessions. Training is all about achieving the goal that you set. In company, in a location elsewhere and even online! After the training we can report any areas for improvement for the organization.
